Introduction

General informations about integration with Okazje.info

After filling out the registration form on [Rejestracja](#), you get to enter the administration panel <http://admin.okazje.info.pl/>

[Okazje.info](#) is a price comparison service. To make offers available on our site, you need to disclose complete offer of your shop in Okazje XML format, which is an exchanging data file.

XML file is required to be available under particular URL, e.g. <http://www.sklep.pl/porownywarki/okazje.xml>. URL needs to be send at integracja@okazje.info.pl or given in shop administration panel in [Integracja](#) bookmark.

Information about starting the integration process you receive through e-mail.

For more details on integration process go to FAQ section in administration panel.

Integration with support of existing solutions for online shops

Okazje.info cooperates with every shop technology in Poland. The whole list of technologies you can find under Integracja z porównywarką Okazje.info. If your shop is supported by technology that Okazje.info cooperates with - XML file's URL is available in administration panel.

If your shop is supported by osCommerce please write us an e-mail at integracja@okazje.info.pl and we provide you a special plugin which will help you generate XML file. All you have to do is just disclose the plugin on your server, e.g. <http://www.sklep.pl/porownywarki/okazje.xml> and send us an e-mail at integracja@okazje.info.pl with URL of the plugin or you can simply disclose such URL on your own in [Integracja](#) section.

Preparing XML file

In case that technology which supports your shop does not disclose any plugin - you will have to prepare one according to specification you find below:

Product variants

The variants of one product have to differ. Variant is a separate version of one product which allows us to distinguish it by parameters such as colour, capacity or additional elements.

Each variant should be given as an separate offer containing required data which is essential for its correct presentation on okazje.info.

The detailed informations you can find in Okazje XML specification and Structures of XML files for particular crafts.

Exemplary variants of products from different crafts:

- **Digital single-lens reflex cameras:**
 - Canon EOS 1100D body
 - Canon EOS 1100D + 18-55 mm
 - Canon EOS 1100D + 18-200 mm

- **Cell phones and smartphones**
 - Apple iPhone 5 16GB czarny
 - Apple iPhone 5 16GB biały
 - Apple iPhone 5 32GB czarny
 - Apple iPhone 5 32GB biały

- **Tablets:**
 - Apple iPad 3 16GB Wifi czarny
 - Apple iPad 3 16GB Wifi biały
 - Apple iPad 3 32GB Wifi biały
 - Apple iPad 3 16 GB 4G biały
 - Apple iPad 3 16 GB 4G czarny

- **Laptops:**
 - SONY VAIO SVE-14A2M6E biały
 - SONY VAIO SVE-14A2M6E czarny
 - Sony VAIO SVS-1312G3E 6GB
 - Sony VAIO SVS-1312G3E 4GB

Due to changes we are planning on making, categories "Movies" and "Music" will be deleted until 01.06.2016 and won't be displayed at Okazje.info anymore.

Regarding an amendment in antinicotine legislation (Ustawa z dnia 9 listopada 1995 r. o ochronie zdrowia przed następstwami używania tytoniu i wyrobów tytoniowych (tekst jedn.: Dz. U. z 2015 r. poz. 298 z późn. zm.) we do not classify offers falling under Nicotine related categories except from lighters.

Okazje XML specification

Required and obligatory fields:

Field	Description
id (required field)	<p>Offer id</p> <p>Each offer must have its own, unique identification number , e.g:</p> <p><id>34532</id> (may consist of digits or letters). Offer_id must be unique and cannot be doubled, f.e: <id>3</id><name> Femi Pleasure Bluza Lauren S</name> <id>3</id><name> Femi Pleasure Bluza Lauren M</name> <id>3</id><name> Femi Pleasure Bluza Lauren L</name> because our system identifies only one unique offer_id and only one offer will be displayed.</p> <p>It occurs mostly in URL field as well.</p> <p>Such offer id should not change during the next updates of XML file, you cannot deliver a TV first and a smartphone next under the same offer_id because if you do – under the TV we will display a smartphone.</p>
name (required field)	<p>Offer name</p> <p>Correct offer name should be as unique as possible so that it should not be mistaken with one another. Offers like 'a green leaf' or 'pendrive 8gb' cannot be either compared or even displayed.</p>
description (obligatory field)	<p>Offer description</p> <p>Each offer must have its own description, if it's a description taken from your site make sure it' complete – a complete description taken from your shop must be delivered in your xml file.</p> <p>If you won't deliver us a complete description our search algorithm won't make it possible to find your offer and your offer will not be displayed in search results since our search algorithm won't be able to find any of searched information in your xml file.</p> <p>Important: A description is used only for searching offers and adjusting them to filters, it is NOT Google indexed so you do not have to worry about duplicated content.</p>
category (required field)	<p>Shop category path</p> <p>Each offer must be contained in a category path that suggests in which category we should display it (it's mostly just a shop category path). General categories such as 'Promotion' , 'Special offer' , 'Sale' make it impossible to classify such offer to correct category and it won't be displayed at Okazje.info.</p>

<p>price (required field)</p>	<p>Product price (REQUIRED)</p> <p>Latest offer price gross (with VAT) in PLN, in digital format. Advice: If price includes polish grosz - separate it with either dot or comma: <code><price>825.50</price></code> or <code><price>825,50</price></code>.</p> <p>You cannot separate groups of digits with space and remember that you can separate only grosz from zloty.</p> <p>Incorrect prices:</p> <p><code><price>8.200.45</price></code> - dot between thousands and hundreds; correct price: <code><price>8200.45</price></code> <code><price>8 200</price></code> - space is used in order to separate digits.</p>
<p>old_price (obligatory field)</p>	<p>Offer price before bargain</p> <p>If offer is an bargain offer you can add its older price, such offer will be displayed as a promotional one in promotions-filter.</p>
<p>url (required field)</p>	<p>Offer URL (REQUIRED)</p> <p>After entering a particular URL customers should have a chance to order and buy the offer directly, e.g:</p> <p><code><url> http://www.your_shop.com/products_id=73</url></code></p> <p>Advice: If URL includes signs such as & - place them between <code><![CDATA[and]]></code> or swap them into <code>&amp;</code>, e.g: <code><url>http://www.your_shop.com/prod_id=73&amp;cat=2</url></code></p> <p>Each offer (even its variants) should own its unique URL. If it is not possible - finish URL with #123 where 123 is an offer id.</p>
<p>producer (required field)</p>	<p>Producer (REQUIRED)</p> <p>Each offer has to contain a producer, a lack of it makes it impossible to display such offer. If you are a manufacturer you should contain a name of your shop in <code><producer></code> field. You can do it only if you are the real manufacturer of an offer.</p>
<p>image (obligatory field)</p>	<p>Image url (REQUIRED)</p> <p>Image URL should lead to high quality, full size picture. Minimum size is 220x220 pixels. If an offer does not have any picture attached please leave this field empty, but please keep in mind that this offer won't be displayed. Small size, low quality or watermarks can cause a lack of picture of a product to which this offer has been attached. Each variant should have a picture which allows to distinguish its parameters, f.e colours.</p> <p>Advice: If URL includes signs such as & - swap them for <code>&amp;</code>, e.g: <code><image>http://www.your_shop.com/images/45f&amp;51c99.jpg</image></code></p> <p>Incorrect image URL:</p>

	<p><image>www.your_shop.com/images/73.jpg</image> - incomplete URL, lack of http://</p> <p><image>/images/73.jpg</image> - incomplete URL, lack of http:// and server's URL.</p> <p>It's possible to add more pictures to one offer. Pictures should be grouped under <images></images>. Main picture is tagged as <image></image>, the next ones as <addimage></addimage> f.e:</p> <pre><images> <image>http://twoj_sklep/uploads/products/action_14958-0.jpg</image> <addimage>http://twoj_sklep/uploads/products/action_569-0.jpg</addimage> <addimage>http://twoj_sklep/uploads/products/action_16301-0.jpg</addimage> </images></pre>
<p>attribute (required field)</p>	<p>A field including: attributes, technical parameters, producer's codes</p> <p>Giving unique ISBN (for books) or EAN is required and allows us attaching your offers to correct products.</p> <p>In case of colour variants an attribute 'colour' is required.</p> <p>Producer's code:</p> <pre><attribute name="code">LX.ABU05.060</attribute> <attribute name="code">29Z010</attribute> <attribute name="code">108000600</attribute> <attribute name="code">SG150</attribute> <attribute name="code">WJ192EA</attribute> <attribute name="code">BNMKKI</attribute> <attribute name="code">256855</attribute> <attribute name="code">BE-AN-CW</attribute></pre> <p>ISBN</p> <pre>np.: <attribute name="ISBN">8324007156</attribute> <attribute name="ISBN">5785557857</attribute></pre> <p>EAN</p> <pre>np.: <attribute name="EAN">9788324589814</attribute> <attribute name="EAN">5758475855474</attribute></pre> <p>Colour:</p> <pre>np: <attribute name="Kolor">biały</attribute> <attribute name="Kolor">zielony</attribute> <attribute name="Kolor">różowy</attribute></pre> <p>In this field you are able to deliver other parameters as well.</p> <p>For more details on required attributes go to:</p> <p>Struktury plików XML dla poszczególnych branż</p>
<p>weight (obligatory field)</p>	<p>Weight</p> <p>f.e <weight>0,25 kg</weight></p> <p>Whole weight of the offer in kilograms, given in order to determine an</p>

	<p>indicative shipping cost.</p> <p>Advice: Another way to provide offer's weight is to place it along the attributes:</p> <p>f.e <attribute name="waga">0,25 kg</attribute></p>
<p>availability (obligatory field)</p>	<p>Offer availability</p> <p>The should be only available offers delivered in your xml file. If an offer is unavailable in your shop you should remove it immediately from it.</p> <p>Adequate statuses of offer availability:</p> <ul style="list-style-type: none"> 1 - product available 3 - product available within 3 days 7 - product available within 7 days 14 - product available not earlier than within a week <p>Correct availability notation:</p> <p><availability>1</availability></p> <p>Incorrect notation - with use of literal description <availability>produkt dostępny</availability> - in this case you should use status 1:</p>
<p>CAUTION Leave an empty field if an offer does not own any attributes/parameters.</p>	

Structures of XML files for particular crafts

General attributes required by integration:

- Producer
- offer's description
- code
- EAN
- picture

[General attributes required by integration](#)

[Offers integration for category Electronics and Tools](#)

[Offers integration for category Games](#)

[Offers integration for category Books](#)

[Offers integration for category Cosmetics](#)

[Offers integration for category Health](#)

[Offers integration for category Clothing and shoes](#)

[Offers integration for category Moto parts](#)

[Offers integration for category Baby](#)

[Offers integration for category Sport & hobby](#)

[Offers integration for category Home](#)

General pattern applies to categories such as:

- Electronics (Computers, Small and large appliances, TV, Audio, Camera&Photo, Phones, Office)
- Household accessories (m.in.: DIY and Home Improvement, Bathroom, Lighting)
- Toys

Required attributes:

- producer
- offer's description
- code
- EAN
- colour
- original product or substitute
- picture

If you are in possession of other attributes please disclose them too, it may help us to deliver complete parameters and:

- your product will be displayed higher in search results
- you product can be found easier
- your product will be displayed under correct filters

Offers integration for category Games

Required attributes:

- producer
- offer's description
- platform
- genre
- age group
- EAN
- picture

If you are in possession of other attributes please disclose them too, it may help us to deliver complete parameters and:

- your product will be displayed higher in search results
- you product can be found easier
- your product will be displayed under correct filters

In case you sell gamekeys please provide server types also, f.e STEAM, STEAM Gift, ORIGIN, Uplay, Xbox Live

Offers integration for category Clothing and shoes

Required attributes:

- image – required for every particular offer – remember that color from the picture has to be the same as an actual color of an offer (if there is a white blouse the provided color must be white)
- description
- producer – please provide it in attribute as below:

`<producer>Puma</producer>`

It would be beneficial if you put it at the beginning of an offer name:

`<name>Puma Kurtka Fun Padded Jacket 83009-525</name>`

- model – should be delivered in the name of an offer
 - `<name>Obsessive Huntress Chemise</name>`
 - `<name>Obsessive stringi Armena</name>`
 - `<name>Axami biustonosz V-511</name>`
 - `<name>Gorsenia figi 35179</name>`

- code

Should be delivered in attributes in a `<code>` field:

`<attribute name="code">83009-525</attribute>`

`<attribute name="code">Z92337</attribute>`

But it's also beneficial to provide it at the end of an offer name:

`<name>Puma Kurtka Fun Padded Jacket 83009-525</name>`

`<name>Reebok T-Shirt Rbk Est79 Grph Z92337</name>`

- Color – as a parameter, `<attribute name="Kolor">Green</attribute>`

Please keep in mind that if an offer occurs in different colors you should provide every single one as a SINGLE offer:

`<id>1</id>`

`<name>Nife bluzka B65</name>`

`<attribute name="Kolor">Zielony</attribute>`

`<id>2</id>`

`<name>Nife bluzka B65</name>`

`<attribute name="Kolor">Czerwony</attribute>`

- Size - as a parameter `<attribute name="Rozmiar">S;L;XL</attribute>` - *each size should occur after semicolon!*
- exact category path containing sex

Odzież i dodatki/Odzież damska/Bielizna/Biustonosze

Moda i styl / Odzież / Bielizna / Damska / Bielizna ciężowa

Odzież/Bielizna/Szlafroki męskie

Odzież damska / Odzież / Sukienki

- EAN

If you are in possession of other attributes please disclose them too, it may help us to deliver complete parameters and:

- your product will be displayed higher in search results
- you product can be found easier
- *your product will be displayed under correct filters*

Picture for every single offer in this category is strictly required.

Advices about integration

- Polish signs format in XML file should be in ISO-8859-2, UTF-8 or Windows 1250 would be fine too. Exemplary headings of XML document:

```
<?xml version="1.0" encoding="ISO-8859-2"?>
```

```
<?xml version="1.0" encoding=" UTF-8"?>
```

- If attribute for particular product does not exist please leave an empty space, e.g `<producer></producer>`. Correct structure of XML file needs to be kept.
- Signs within XML tags you have to swap:

signentity
<<
>>
&&

or place the tag between `<![CDATA[content]]>`

np.: `<producer><![CDATA[content]]></producer>`

- You can verify XML correctness by opening it in Internet Explorer, Mozilla Firefox (the bigger the file is the longer the opening lasts) or through XML validator.

Technical support

For details on integration process go to [Frequently Asked Questions](#) section you can find in administration panel.

If any questions occur anyway - contact us through [Contact Form](#).

Customer Service

Any questions? We'd love to help!
